Introduction

The first annual Head of the Charles Regatta is patterned after similar races run in England for the past 40 years. It makes use of a narrow and tortuous course at a time of year when no other rowing competition is available. The boats are started at 30 second intervals, and their order of finishing is determined from the time elapsed over the 3 mile course. The actual computation of results is done by I.B.M. at its M.I.T. Computer.

Prizes will be awarded at The Penthouse, 1010 Memorial Drive, Cambridge, Mass., after the conclusion of the Regatta.
