

WHEATON COLLEGE CHARLES

REGATTA SUNDAY, OCTOBER 17, 1976

The Twelfth Annual Head of the Charles Regatta

Sponsored by the Cambridge Boat Club, Charles River, Massachusetts
Course Distance: 3 miles upstream

The annual Head-of-the-Charles Regatta sponsored by the Cambridge Boat Club is patterned after the many English "Head-of-the-River" races. These make use of a tortuous course which not only puts the Coxswain's steering to test but allows greater distances to challenge the Oarsmen's endurance. By eliminating the need for qualifying races, head races also allow many more boats to compete in a given amount of time.

Although the contestants are rowing against time, spectators are witness to keen competition between boats which take running starts only 10 seconds apart. Boats are numbered consecutively so that it is easy to see their relative positions in each event. To avoid overlapping events at the finish, each event is started 15 to 30 minutes apart. Note that each boat is identified by a bow marker which corresponds to its number in the program.

Each shell in this Regatta will be timed over the race course by two distinct and separate timing systems. The primary system entails the timing (to 1/10 of a second) by computer terminals located at the starting line and at the finish line. These terminals are connected to a PDP-10 computer at the First Data Corporation in Waltham, Massachusetts, where the results will be computed almost immediately. Accusplit III precision digital stop watches will record the starting and finishing times of each shell.

The times from the computer will remain unofficial until the Regatta umpires have had an opportunity to report course rule violations and invoke time penalties, and until any protests received within 15 minutes after the end of each race have been resolved.

The starting line.

Donation: One Dollar

Its Origin

On a cold winter night in December, 1964 three members of the Cambridge Boat Club (Howard McIntyre, D'arcy MacMahon, and John Vincent) met with British rowing luminary Ernest Arlett to consider the possibility of initiating an annual rowing event on the Charles River in Boston, Massachusetts. The idea was to integrate scholastic and club rowing in a unique and informal way, and to promote the recreational and non-polluting use of the river. While an April date was given much consideration, the group finally decided to fill the void created by the lack of post-Labor Day competition and chose the Saturday nearest to the Columbus Day holiday. The idea of a "Head-of-the-River" race, patterned after the famous and successful English regatta, was unanimously adopted. It was felt that this type of race would minimize the emphasis on winning and losing, would accommodate a large number of competitors, and would avoid the wind and motor-boat disturbances of the open lower river basin.

With the sanction of the National Association of Amateur Oarsmen, the financial support of the Boston Globe, and the valiant efforts of many Cambridge Boat Club volunteers like Jerome Olrich and Zeus Wade, the first Head of the Charles Regatta was held on October 16, 1965. The race drew nearly 100 boats and was an instant success with the public and rowers alike.

What has happened since is a matter of historical record. The Regatta has grown to become the largest in the World and now draws the very finest rowing talent from North America and beyond. In 1973, the Cambridge Boat Club officially took over the responsibility for managing the Regatta, and placed it under the trusteeship of three club members appointed annually by the Club's elected Board of Directors. The race's timing system has been transformed from a simple homemade clock-mechanism, to a sophisticated computerized electronic system. The program has expanded from twelve to eighteen events with a maximum of forty entries each, and the Regatta is now held annually on the third Sunday in October. In spite of its growth and seriousness of its competition, the Regatta continues to be a refreshingly informal and friendly affair.

It is only because of the unselfish efforts and endless hours of hundreds of unpaid volunteers that the Head-of-the-Charles keeps going. All who row in it and all who watch it, owe these dedicated individuals a great debt of thanks. As long as the Regatta continues to provide a source of amusement and gratification to its administrators and volunteers from the surrounding community, we can be assured that the Charles, unlike its namesake Charles the First of England in 1649, will keep its Head.

Trophies

After each event, points will be awarded to represented organizations for each finishing entry on the following basis:

$\frac{P(E+1-F)}{ER}$ Key: P = points assigned to the event E = number of entries finishing the race F = finishing place of the entry R = finishing place of that entry relative to entries from same organization in that event

Trophies may be won by individual clubs, schools and colleges. Mixed entries (representing more than one organization) may win medals only.

Princeton Trophy is awarded to the fastest crew representing a secondary school.

**Some of our
 best customers
 needed only one good
 reason to try
 time sharing.**

We gave them 14.

Good Reason No. 12: Communications

No information is useful unless you can get to it quickly. With First Data's system you're as close to your data as the nearest phone. That's right, you can call into the system from any phone — anywhere. So look at it this way, wherever there's a phone — there's a computer. And our system can support any terminal made. So you can be sure that we'll be able to meet any communications requirements you have — even difficult or unusual ones.

First Data
